

Here's a professionally structured resume based on the information you provided and the sample resume format:

****[Your Name]****

Full Stack Developer | [City], [State] | [Phone Number] | [Email] | [linkedin.com/in/YourProfile](#)

Professional Summary

Full Stack Developer with extensive experience in designing and implementing robust backend systems using RESTful APIs, Java, and Spring MVC, and creating dynamic, responsive frontend applications with Angular, React, JavaScript, and HTML/CSS. Proficient in Microservices Architecture, ensuring scalability and modularity. Skilled in managing both relational databases like MySQL and Oracle, as well as NoSQL databases such as MongoDB. Experienced in containerization using Docker and orchestrating deployments with Kubernetes. Strong background in collaboration with cross-functional teams to deliver high-quality solutions on time. Solid understanding of OOP, Data Structures, and Design Patterns. Passionate about leveraging Cloud Platforms like AWS and Azure for designing and deploying scalable applications.

Work Experience

****T-Mobile**, Cary, NC**

Full Stack Developer

February 2021 - September 2023

- Designed and implemented enterprise-grade web applications using Java, Spring MVC, and Thymeleaf, delivering seamless user experiences.
- Built modular and reusable UI components with Angular, TypeScript, and SCSS, ensuring cross-browser compatibility and responsiveness.
- Developed SOAP and RESTful APIs to integrate with external services, ensuring secure data transactions.
- Deployed containerized applications using Docker and managed orchestration with Kubernetes for consistent multi-environment operations.
- Integrated real-time messaging and notifications with WebSockets and RabbitMQ, enhancing user interaction.
- Optimized backend performance with data caching using Redis and utilized PostgreSQL for relational data management.

- Enhanced log analysis and error detection using Elasticsearch and Logstash to enable faster troubleshooting.
- Conducted continuous integration and deployment with GitLab CI/CD, reducing manual intervention in build processes.
- Automated end-to-end testing with Protractor and Selenium, ensuring flawless user experience.
- Collaborated with DevOps teams to monitor production systems via Prometheus and Grafana, ensuring system reliability.

Technology Used: Java, Spring MVC, Thymeleaf, Angular, TypeScript, SCSS, PostgreSQL, Docker, Kubernetes, RabbitMQ, WebSockets, Elasticsearch, Logstash, GitLab CI/CD, Protractor, Selenium, Prometheus, Grafana.

****Ford Motor****, Dearborn, MI

Full Stack Developer

August 2019 - January 2021

- Developed robust and scalable applications for vehicle management systems using Java, Struts, and EJB frameworks.
- Built modern UI components with Vue.js, Vuetify, and JavaScript for enhanced fleet management tools.
- Designed and implemented SOAP and REST APIs to facilitate seamless communication with business systems and external vendors.
- Utilized MongoDB for managing unstructured vehicle data and optimized storage solutions for large datasets.
- Enabled real-time data streaming and analytics using Apache Kafka to improve operational insights.
- Automated build and deployment pipelines with Azure DevOps for streamlined software delivery.
- Integrated search functionalities using Elasticsearch for faster data retrieval in internal applications.
- Implemented static code analysis with SonarQube to maintain coding standards and reduce vulnerabilities.
- Configured ActiveMQ for reliable message queuing to improve system integration processes.
- Worked with cross-functional teams using Azure Boards and implemented Agile methodologies to accelerate project completion.

Technology Used: Java, Struts, EJB, Vue.js, Vuetify, MongoDB, Apache Kafka, Elasticsearch, Azure DevOps, SonarQube, ActiveMQ, Azure Boards, SOAP APIs, RESTful APIs.

Education

****Alabama University****

Bachelor's Degree | B.S. in Computer Science

Technical Skills

- **Programming Languages:** Java, Python, C, C++, JavaScript, TypeScript
- **Frontend Technologies:** HTML, CSS, Tailwind CSS, DaisyUI, ReactJS, Redux, Three.js, Next.js
- **Backend Technologies:** Node.js, Django
- **Design Tools:** Figma, Adobe Illustrator, Procreate, Blender
- **Database Management:** MySQL, PostgreSQL, MongoDB, PL/SQL
- **Version Control & Deployment:** Git, Docker

Feel free to customize further with your personal information and any additional achievements or sections as needed.
