

## [Your Name]

Full Stack Developer | [City, State] | [Phone Number] | [Email] | [LinkedIn Profile]

---

### ### Professional Summary

Experienced Full Stack Developer specializing in RESTful APIs for robust backend development coupled with proficiency in Angular, React, JavaScript, and HTML/CSS for dynamic and responsive frontend design. Expert in developing applications following Microservices Architecture, ensuring scalability and modularity. Extensive experience with relational databases such as MySQL and Oracle, as well as NoSQL databases like MongoDB. Skilled in containerization using Docker and orchestrating deployments with Kubernetes. Effective collaborator with cross-functional teams delivering high-quality, on-time solutions. Strong understanding of Object-Oriented Programming (OOP), Data Structures, and Design Patterns. Passionate about leveraging Cloud Platforms like AWS and Azure to design and deploy highly available and secure applications.

---

### ### Work Experience

**\*\*T-Mobile\*\***

**\*Cary, NC\***

**\*\*Full Stack Developer\*\***

**\_Feb '21 - Sep '23\_**

- Designed and implemented enterprise-grade web applications using Java, Spring MVC, and Thymeleaf, delivering seamless user experiences.
- Built modular and reusable UI components with Angular, TypeScript, and SCSS, ensuring cross-browser compatibility and responsiveness.
- Developed SOAP and RESTful APIs, enabling integration with external services and ensuring secure data transactions.
- Deployed containerized applications using Docker and managed orchestration with Kubernetes for consistent multi-environment operations.
- Integrated real-time messaging and notifications using WebSockets and RabbitMQ, improving user interaction.
- Optimized backend performance by implementing data caching with Redis and utilizing PostgreSQL for relational data management.
- Improved log analysis and error detection through Elasticsearch and Logstash, enabling faster troubleshooting.
- Conducted continuous integration and deployment with GitLab CI/CD, reducing manual intervention in build processes.
- Automated end-to-end testing with Protractor and Selenium, ensuring flawless user experiences.

- Collaborated with DevOps teams to monitor production systems via Prometheus and Grafana, maintaining system reliability.

\_Technologies Used: Java, Spring MVC, Thymeleaf, Angular, TypeScript, SCSS, PostgreSQL, Docker, Kubernetes, RabbitMQ, WebSockets, Elasticsearch, Logstash, GitLab CI/CD, Protractor, Selenium, Prometheus, Grafana.\_

**\*\*Ford Motor Company\*\***

**\*Dearborn, MI\***

**\*\*Full Stack Developer\*\***

\_Aug '19 - Jan '21\_

- Developed robust and scalable applications for vehicle management systems using Java, Struts, and EJB frameworks.
- Built and styled modern UI components with Vue.js, Vuetify, and JavaScript, enhancing internal tools for fleet management.
- Designed and implemented SOAP and REST APIs, enabling seamless communication across business systems and external vendors.
- Utilized MongoDB for managing unstructured vehicle data and optimized storage solutions for large datasets.
- Enabled real-time data streaming and analytics using Apache Kafka, improving operational insights.
- Automated build and deployment pipelines with Azure DevOps, ensuring streamlined software delivery.
- Integrated search functionalities using Elasticsearch, facilitating faster data retrieval for internal applications.
- Employed SonarQube for static code analysis, maintaining high coding standards and reducing vulnerabilities.
- Configured ActiveMQ for reliable message queuing, improving system integration processes.
- Worked with cross-functional teams using Azure Boards and implemented Agile methodologies, accelerating project completion.

\_Technologies Used: Java, Struts, EJB, Vue.js, Vuetify, MongoDB, Apache Kafka, Elasticsearch, Azure DevOps, SonarQube, ActiveMQ, Azure Boards, SOAP APIs, RESTful APIs.\_

---

### ### Education

**\*\*B.S. in Computer Science\*\***

\_Alabama University\_

---

### ### Technical Skills

- **\*\*Programming Languages\*\***: Java, Python, C, C++, JavaScript, TypeScript
- **\*\*Frontend and Backend Technologies\*\***: HTML, CSS, Tailwind CSS, DaisyUI, ReactJS, Redux,

Three.js, Next.js, Node.js, Django

- **Design Tools**: Figma, Adobe Illustrator, Procreate, Blender
- **Database Management**: MySQL, PostgreSQL, MongoDB, PL/SQL
- **Version Control & Deployment**: Git, Docker

---
